Application General List

The general list can be submitted to us using 2 methods.

You can submit information by entering it manually attach the file by uploading it. If you upload the file, then your general list will be created by our staff after you submit the application.

The uploaded file is usually an Excel, Word, or PDF file which we can then use as the source of the General List items. You can upload multiple files and replace ones that are no longer relevant.

You can also select to view or renumber the general if one already exists for this application.

Please select one of the following options:

- I would like to upload a file that will contain the General List
- I would like to enter the General List manually
- I would like to view the existing General List
- I would like to renumber the General List
- I will enter General List items later - Continue to Shipping

Need Help?
